

ReactJS HOL 10

Using JSX in React

In this exercise, I developed a React application named **officespacereentalapp** using JSX. I created JSX elements to display the heading, office image, office details, and applied inline CSS to change the rent color based on its value. The application displayed the office name, rent, and address successfully. The expected output was obtained after executing the application.

Source Code

App.js

```
import './App.css';

import office from './office.png';

function App() {

  const element = "Office Space";

  const ItemName = {

    Name: "DBS",

    Rent: 50000,

    Address: "Chennai";

  }

  const rentStyle = {

    color: ItemName.Rent <= 60000 ? "red" : "green" };

  return (

    <div className="App">

      <h1>{element}, at Affordable Range</h1>

      <img

        src={office}

        width="25%"

        height="25%"

        alt="Office Space"  />

      <h1>Name: {ItemName.Name}</h1>

      <h3 style={rentStyle}>

        Rent: Rs. {ItemName.Rent}
```

```

    </h3>

    <h3>

      Address: {ItemName.Address}

    </h3>

  </div>;
}

export default App;

App.css

.App {

  margin-left: 180px;

  margin-top: 40px;

  font-family: Arial, Helvetica, sans-serif;}

img {

  margin-top: 15px;

  margin-bottom: 20px;}

h3 {

  margin: 8px 0;

}

```

Figure 1: Project Structure

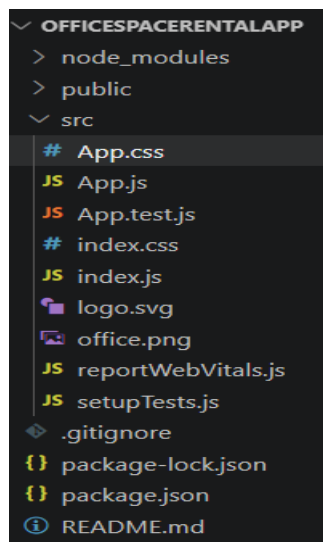

Figure 2: Browser Output

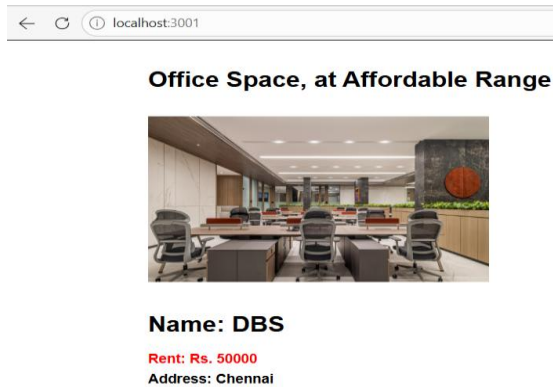

Figure 3: Terminal Output

```
PROBLEMS  OUTPUT  DEBUG CONSOLE  TERMINAL  PORTS

PS C:\Users\HP\Documents\cricketapp\officespacerentalapp> npm start

You can now view officespacerentalapp in the browser.

  Local:      http://localhost:3001
  On Your Network: http://10.1.46.55:3001

Note that the development build is not optimized.
To create a production build, use npm run build.

webpack compiled successfully
█
```

Result

The React application was implemented successfully using JSX. The office details were displayed with JSX elements, and inline CSS was used to display the rent amount in red when the rent was below ₹60,000. The application executed successfully and produced the expected output.
